

Ammunition hot shots

RUAG Ammotec tells *Defence & Security Systems International* why the company's ammunition and grenades are favoured by armed forces, and how they help them to be environmentally friendly.

RUAG Ammotec supplies high-precision ammunition. Its main customers are international armed and special forces, which include those from Switzerland and Germany, and some Nato forces.

The company's goal is to produce high-precision ammunition that delivers the best performance. Its product range includes:

- various ammunition for small arms
- hand grenades
- mortar and artillery training systems
- ammunition disposal.

One of RUAG Ammotec's specialities is the development and production of lead-free ammunition, including a non-toxic solid bullet that uses Sintox priming technology. This technology is, for example, applied in the 9mm Luger Self. The company is also developing lead-free bullets for rifles.

“ One of RUAG Ammotec's specialities is the development and production of lead-free ammunition, including a non-toxic solid bullet that uses Sintox priming technology. ”

SWISS P – the sniper's choice

The SWISS P rifle ammunition meets all requirements for special forces and police deployments. In addition to outstanding precision and ballistics, its features include:

- armour-piercing, high-penetration capacity

Right and below right: SWISS P rifle ammunition is ideal for snipers, and can be used to tackle targets behind glass.

Below: RUAG Ammotec's fragmentation hand grenade.

- Styx Action high-impact deformation
- a target for precision and training
- being suitable for use against targets behind glass
- ball ammunition for use by armed forces under international conventions
- subsonic extra-heavy projectiles that boast different ballistics, for special requirements.

Infantry cartridges that the company offers include:

- 4.6mm × 30mm PDW
- 5.56mm × 45mm Nato (.223 Rem)
- 7.62mm × 51mm Nato (.308 Win)
- 12.7mm × 99mm AP.

RUAG Ammotec also provides the following 9mm × 19mm (Luger) ammunition:

- Luger Self (the real lead-free ammo)
- 9mm Luger plastic blank
- 9mm Luger ball with different bullets
- 9mm penetrator.

The company also supplies other 9mm ammunition especially designed for law enforcement purposes.

Hand grenades

RUAG Ammotec's hand grenade offers new technology to tackle the extensive use of modern body armour, as well as providing enhanced safety during use, storage and transport. It has been chosen by the British Armed Forces, and is also used by the Dutch and Swiss armed forces. The product range includes:

- fragmentation hand grenades
- offensive hand grenades
- explosive practice hand grenades, which are supplied with the relevant training tools.

Mortar and artillery sub-calibre training systems

RUAG Ammotec's MT 25mm sub-calibre mortar training system is an effective tool to save costs and provide high-quality training in small areas. The system is made from an aluminium alloy and is available for four sizes of mortars: 60mm, 81mm and 120mm.

The standard 14.5mm training cartridges are available with impact fuse and pyrotechnic time-fuse. ■
